 E27 LED Globe Bulbs
 500 - 800 Lumen output and from 2700K - 3000K colour temperature. These styles are particularly effective in the white colour and in the metallic options for a softer less reflective look.

E27 LED Filament style bulbs
 will bring out the reflective qualities of the metallic finishes brilliantly. Best performance would be from 600-900 Lumen Output with temperature 2200K - 2700K.
